

## Microwaved Water - See What It Does To Plants

Below is a science fair project. In it she took filtered water and divided it into two parts. The first part she heated to boiling in a pan on the stove, and the second part she heated to boiling in a microwave. Then after cooling she used the water to water two identical plants to see if there would be any difference in the growth between the normal boiled water and the water boiled in a microwave. She was thinking that the structure or energy of the water may be compromised by

microwave. As it turned out, even she was  
amazed at the  
difference.

# One week old "clippings"

Although both clippings are alive, the microwave water one is wilted and unhealthy, while the purified one is peppy and healthy

Day seven

I have known for years that the problem with microwaved anything is not the radiation people used to worry about, It's how it corrupts the DNA in the food so the

body can not  
recognize it. So the body wraps it in fat cells  
to protect itself  
from the dead food or it eliminates it fast.  
Think of all the  
Mothers heating up milk in these "Safe"  
appliances. What  
about the nurse in Canada that warmed up  
blood for a  
transfusion patient and accidentally killed  
them when the  
blood went in dead. But the makers say it's  
safe. Never mind  
then, keep using them. Ask your Doctor I am  
sure they will  
say it's safe too. Proof is in the pictures of  
living plants dying.

Remember You are also Living. Take Care.

FORENSIC RESEARCH DOCUMENT

RELEASE PRIORITY: CLASS I ROO1a  
Ten Reasons to Throw out your Microwave  
Oven

From the conclusions of the Swiss, Russian and German scientific clinical studies, we can no longer ignore the microwave oven sitting in our kitchens. Based on this research, we will conclude this article with the following:

- 1). Continually eating food processed from a microwave oven causes long term - permanent - brain damage by "shorting out" electrical impulses in the brain [depolarizing or de-magnetizing the brain tissue].

2). The human body cannot metabolize [break

down] the  
unknown by-products created in microwaved  
food..

3). Male and female hormone production is  
shut down

and/or altered by continually eating  
microwaved foods.

4). The effects of microwaved food by-  
products are residual

[long term, permanent] within the human  
body.

5). Minerals, vitamins, and nutrients of all  
microwaved food

is reduced or altered so that the human body  
gets little or no

benefit, or the human body absorbs altered

compounds that  
cannot be broken down.

6). The minerals in vegetables are altered into  
cancerous free  
radicals when cooked in microwave ovens.

7). Microwaved foods cause stomach and  
intestinal cancerous  
growths [tumors]. This may explain the  
rapidly increased  
rate of colon cancer in America ..

8). The prolonged eating of microwaved foods  
causes  
cancerous cells to increase in human blood.

9). Continual ingestion of microwaved food  
causes immune

system deficiencies through lymph gland and  
blood serum  
alterations.

10). Eating microwaved food causes loss of  
memory,  
concentration, emotional instability, and a  
decrease of  
intelligence.

Have you tossed out your microwave oven  
yet?

After you throw out your microwave you can  
use a toaster oven as a replacement. It works  
well for most and is nearly as quick.
